RELEASE NOTES

Release name   : april-2018
Date   : 20-04-2018
Author   : Martin Lingstuyl

Short description about the release

This release contains a long-awaited update to the PDF viewer. The PDF's show in a higher quality, the agenda can be seen while browsing the document, and an extra viewing mode (fit page to screen) makes life easier.

New functionalities

In this release the following functionalities are added:

Reference nr	Description
0001	PDF viewer update: extra viewing mode 'fit page to screen'.
0002	PDF viewer update: see the agenda side by side with the pdf page.
0003	PDF viewer update: quality update.
0004	PDF viewer update: smaller stroke size for pencil and shapes.
0005	Added the ability to delete attachments from the devices file system
0006	Added the ability to save copies of the original files to SharePoint and open these files from the app and the organizer. This can be set on or off using the settings screen.

Solved issues

In this release the following issues are resolved:

Reference nr	Description
0007	PDF viewer update: Fixed quality issues for iPad pro
0008	Fixed rendering issue where the PDF Viewer would sometimes show a white page or a partial page.
0009	When signing in again through Office, the emailaddress would not be automatically filled in.
0010	Clicking external links in a PDF file did not open them in the browser.
0011	Updated security measures.
