

RELEASE NOTES

Release name : juli-2018
Date : 26-07-2018
Author : Martin Lingstuyl

Short description about the release

In this release we welcome an extension to our device family: Android & Apple Phones!

New functionalities

In this release the following functionalities are added:

Reference nr	Description
0001	Support for Mobile
0002	Annotation toolbar update: Move the annotation toolbar to the top or make it invisible
0003	Annotation toolbar design update

Solved issues

In this release the following issues are resolved:

Reference nr	Description
0004	Some users experienced timeouts when opening the Organizer
0005	When removing an entire block of minutes text, this change was not saved on Internet Explorer and Edge. Users therefore experienced the inability to clear minutes for a specific topic.
0006	Some users experienced issues opening the Minutes Preview.

Known issues

The following issues are already noted, but aren't resolved in this release.

Reference nr	Description	Work around
0007	When using Easy2Meet on the iPhone X, it's hard to switch pages using the page slider, because of the home button.	Switch pages using swipe gestures or the navigation buttons.
