---

## Short description about the release

A release with hotfixes and updates for meeting organizers.

## New functionalities

In this release the following functionalities are added:

Reference nr	Description
0001	Using Tab, Shift + Tab hotkeys on new Topics.
0002	Using the Outlook add-in on delegated calendars.
0003	Saving appointments in Outlook in the timezone of the organizer.

## Solved issues

In this release the following issues are resolved:

Reference nr	Description
0004	Meeting organizers could not open multiple Easy2Meet add-ins in one browser.
0005	Meeting organizers got a continuous stream of errors when an attachment upload went wrong.
0006	Meeting organizers could not remove tags from Tasks and Decisions.
0007	Meeting organizers could not edit meeting type info anymore.
0008	Names of participants would in some cases start showing the emailaddress as well.
0009	Issue in Internet Explorer blocked creating a meeting from Outlook add-in
0010	Outlook add-in would sometimes not respond on clicking the 'Open in Easy2Meet' or 'Use in Easy2Meet' buttons
0011	Meeting organizers had trouble deleting child topics of child topics.
0012	Outlook add-in had a long startup time on some devices.

## Known issues

The following issues are already noted, but aren't resolved in this release.

Reference nr	Description	Work around
0013	When using Easy2Meet in Internet Explorer and the Outlook add-in, sometimes opening Easy2Meet will result in a 'Require Nonce is true' error message.	<ol style="list-style-type: none"><li>1. Go to the Outlook Calendar</li><li>2. Click 'About Easy2Meet' in the ribbon.</li><li>3. Click 'Sign out'</li></ol> <p>When opening Easy2Meet, the error message should be gone.</p>
