# RELEASE NOTES

Release name   : August 2016
Date   : 01-08-2016
Author   : Martin Lingstuyl

Short description about the release

This release is about a better integration with SharePoint and an update for the UI regarding the list of meetings and other lists.

New functionalities

In this release the following functionalities are added:

Reference nr	Description
0001	Search and add attachments to Easy2Meet from all over SharePoint.
0002	Quickly view the content of your attachments with the SharePoint preview popup.
0003	Easily sort and filter the meeting list by meeting type and timeframe to quickly find the meeting you are after. (Secretary Console & Participant app)

Solved issues

In this release the following issues are resolved:

Reference nr	Description
Secretary Console	
1001	Copying a meeting with sub topics resulted in a new meeting without sub topics
1002	An e-mail user who was added after publishing a meeting, would not get an email with the agenda and attachments
1003	Archived participants would still get updates regarding meetings they already were part of before being archived.
1004	Aborting an attachment upload would throw an error.
1005	Uploading large attachments was impossible.
1006	Updated the Presence form on the minutes preview pane. More easily switch presence for participants.
1007	When a secretary had read-only rights to a participant calendar, publishing would throw an error.
1008	Accidentally clicking the retract meeting reservation link on a published meeting, would unpublish the meeting.
1009	Dragging and dropping attachments not possible.
1010	If the secretary console would remain open on your browser screen, the connection to SharePoint would break after a certain time.
Participant app	
2001	Sharing annotations with specific participants did not work in some cases.
2002	The 'Jump to meeting' link was missing on the Tasks page.
2003	Task details were invisible sometimes, when clicking on a task.
2004	After opening a topic panel, one would not be able to scroll down and see all meeting details.
2005	Tasks that were created on unpublished meetings were already visible in the app

RELEASE NOTES

2006	Annotations of type 'Note' could not be opened and viewed when not in annotation mode.

And some more little fixes and updates.

Known issues

The following issues are already noted, but aren't resolved in this release.

Reference nr	Description	Work around
3001	Only when using Firefox browser: when navigating to another page while the page is still loading, it sometimes shows an error window.	Wait until the page is fully loaded before navigating away.
