

# RELEASE NOTES

Release name : augustus-2018  
Date : 22-08-2018  
Author : Martin Lingstuyl

---

## Short description about the release

This release makes it possible to deeplink to a meeting in the participant app, for example directly from a meeting request.

## New functionalities

In this release the following functionalities are added:

Reference nr	Description
0001	Deeplinking to meetings in the app.
0002	Added App Banner on Web app.
0003	Updated mobile support for iPhone X.
0004	Update ability to change preferred language in the participant app.

## Solved issues

In this release the following issues are resolved:

Reference nr	Description
0005	In some cases organizers were not able to delete meetings, tags or document templates.
0006	Fix page freeze / timeout when redirecting from Outlook Add-in after having clicked the 'Use in Easy2Meet' button without first clicking the Send/Save button.
0007	Add extra security measures.
0008	Fix issue with Outlook add-in in some cases throwing exception when updating an existing meeting from Outlook.
0009	When creating a meeting from the Outlook add-in based on a meeting type. The topics of that meeting type would not get included in the creating meeting.
0010	On the Android app, the black bar with virtual navigation buttons would overlay the app after using the keyboard to sign in.
0011	In some situations not all comments would show on tasks and decisions.

## Known issues

The following issues are already noted, but aren't resolved in this release.

Reference nr	Description	Work around
0012	The 'Edit in Organizer' button doesn't successfully open the organizer in the following situation: when the participant has never opened the Organizer add-in on the specific SharePoint site collection from where the meeting originated.	The user should first browse to the SharePoint site collection and open the Easy2Meet add-in.
0013	When creating an appointment in Outlook and clicking the 'Use in Easy2Meet' button (before clicking send/save) Easy2Meet does not retrieve the meeting info.	The user should first click send/save and only
