

RELEASE NOTES

Release name : september-2018
Date : 28-09-2018
Author : Martin Lingstuyt

Short description about the release

This release features extended security measures regarding the use of external users, Azure B2B and fixes for issues reported by customers.

New functionalities

In this release the following functionalities are added:

Reference nr	Description
0001	Security and compliance settings can be done by an IT Administrator. The settings are referring to enabling or disabling the use of external participants and enabling or disabling the use of e-mail participants.
0002	Administrators of Office365 can do specific technical administrators tasks in Easy2Meet, that can't be done by all users.
0003	Organizers can now add Guest users from their Azure Active Directory to Easy2Meet meetings.
0004	Participants can download all meeting attachments by pressing a button.

Solved issues

In this release the following issues are resolved:

Reference nr	Description
0005	Updating the pdf viewer.
0006	The 'Edit in Organizer' button would not always be visible.
0007	The Outlook add-in would in some cases not start the Organizer as expected.
